IMPORTANT: Read This Before Proceeding With Dosing Go to the Prep & Injection Guide for proper reconstitution, syringe sizing, and injection protocols. Mistakes here can compromise your research. the Prep & Injection Guide Mazdutide Mazdutide is a dual agonist of the GLP-1 and glucagon receptors, originally designed to treat type 2 diabetes and obesity. It increases insulin secretion, lowers blood sugar levels, increases energy expenditure, improves fat metabolism in the liver, delays gastric emptying, and causes weight loss. Clinical trials have proven that Mazdutide leads to an average 9.5% weight loss within 12 weeks and 14% average weight loss at 48 weeks. Mazdutide is considered the safest GLP-1 peptide, and side effects are generally minimal. Benefits Boosts metabolic functions Weight loss Burns calories more efficiently Regulates blood sugar Improves lipid levels Better cardiovascular health Improves blood pressure Increases bone health Promotes bone formation and inhibits bone breakdown Reduces risk of bone fracture and osteoporosis Reduces liver fat content Reduces liver inflammation Possible Side Effects Injection site reaction (redness, swelling, and/or itching) Abdominal distension Decreased appetite Diarrhea Nausea Vomiting Contraindications Do not take Mazdutide if you are pregnant or nursing. MAZDUTIDE: 10MG Mix with 1mL (100 units) of BAC water Subcutaneous Administration Dosing Instructions Dose once per week , on the same day each week Remain at each dose level for a minimum of 4 weeks before increasing Start low and only increase dose when well tolerated Dosing Chart 20 units = 2mg 30 units = 3mg 45 units = 4.5mg 60 units = 6mg Stacking Suggestions AOD-9604 – For enhanced lipolysis and targeted fat burning Tesamorelin – For synergistic effects on liver fat, metabolism, and GH support Lipo-C – For energy, detoxification, and liver support during rapid weight loss Tirzepatide or Semaglutide – Rotate between cycles to prolong metabolic effects B12 – For improved mood, energy, and appetite regulation
